Wipeout Specialty Cleaning inc.

I was in the need again to clean graffiti from brick & metal signage. It was a down downtown commercial building. Some of the surface was porous sandstone.

I have used various products over the years, but found I had to scrub, sand, nylon wheel the surface and use a more aggressive tip on the pressure washer to clean.

I recently contacted Wipeout and used their products for "*Graffiti Removal for Brick*" & "*Graffiti Remover for Painted and Assorted Surfaces*" Their products worked with great success.

The day of removal was March 2026 & the temp was 2C.  
I used a green tip with a cold pressure washer and the results were stunning.  
Graffiti came off with no damage to the brick

I would highly recommend that you hook up with Paul and Rick. Two very nice people who know their products.
